OneView™ Solutions

The OneView™ platform provides fleet and equipment operators with the most robust, reliable and expansive features to help reach the most aggressive competitive advantage in today's complex and increasingly costly commercial and industrial environments.

Truck, Trailer & Asset Management

ASSET TRACKING
Track your assets' locations to prevent theft and optimize your operations.

EQUIPMENT MANAGEMENT
Manage equipment location, utilization and diagnostics and optimize your assets.

REEFER MANAGEMENT
Remotely track, monitor, and control the temperature of refrigerated trucks, trailers, or shipping containers with all major OEM makes and models.

TRAILER TRACKING
Track and monitor trailer location and utilization to maximize your fleet efficiency.

TANK-LEVEL MONITORING
Automate your business processes and prevent costly overtime by remotely tracking, monitoring, and receiving up-to-date alerts on bulk tank fluid levels.

Enhanced Fleet Solutions

DISPATCHING & LOGISTICS
Communicate task assignments in real-time to mobile workers through customized workflows, routing, electronic forms and two-way messaging.

ELECTRONIC FORMS
Eliminate paper and process critical data more quickly, reducing time to invoice and improving accuracy.

FLEET MANAGEMENT
Manage your fleet vehicles and drivers in real-time with location, utilization, diagnostics, scorecards and more.

FLEET MAINTENANCE
Leverage asset data to schedule maintenance work, easily analyze trends, spot recurring problems, and reduce downtime and costly repairs.

TIRE PRESSURE MONITORING
Monitor tire pressure and temperature, promoting better fuel efficiency, safety, and vehicle performance.

WEIGH STATION & TOLL BYPASS
Drivewyze enables commercial truck drivers to bypass weigh stations, saving time and money.

ROUTING
Optimize driving routes and get more done in less time, reducing fuel consumption and maximizing efficiency.

NAVIGATION
In-cab turn-by-turn navigation with voice-guided directions to desired destinations, real-time traffic alerts, detours, ETA's and more.

DIGITAL LIBRARY
Store, manage and remotely access documents, images and other files, from anywhere.

Safety & Compliance

CAMERAS
Improve driver behavior with AI-based incident detection and in-cab feedback, improving safety trends and protecting you with video evidence including external cameras.

DVIR & INSPECTIONS
Inspect your assets quickly and easily with an app – capturing defects with images and tracking repairs.

ELD & COMPLIANCE
Our US and Canada certified ELD compliant solution makes HOS management easy, with real-time compliance visibility.

Integrations

API INTEGRATIONS
Create a seamless user experience with 3rd party software and streamline business processes, saving time and reducing errors.

OEM DATA
Vehicle and equipment OEM data plus all operations in one platform.

SENSOR DATA
Add-on sensors for increased visibility to temperature, humidity, on/off, open/closed status and more.
