TANK-LEVEL
MONITORING

Save Time and Money

Monitor Tanks. Make Decisions. Manage Inventories.

OneView™ offers user-friendly, web-based inventory management applications that allow companies to monitor tank levels, schedule deliveries and better manage inventory needs. The turnkey ATG and bulk tank applications share data over the OneView™ platform, keeping you informed on the level, temperature, and condition of your tanks.

Key Features

- Remotely Monitor Tank Levels
- Detect ATG Tank Leaks & Line Leaks
- Predictive Inventory Algorithms
- Customized Dashboards
- Trending Analytics & Reporting
- Customized Alerts & Notifications

Benefits

Improve Inventory Management

- Minimize site visits by remotely monitoring stock levels anytime, anywhere
- Take proactive measures to address critical inventory levels before they result in shortages
- Forecast inventory requirements and efficiently plan to dispatch and optimize routes

Enhance Operation Stability

- Detect leaks, overflows, and equipment malfunction by taking action on maintenance needs to avoid costly repairs and downtime
- Analyze tank data trends to facilitate thorough inspections and equipment servicing
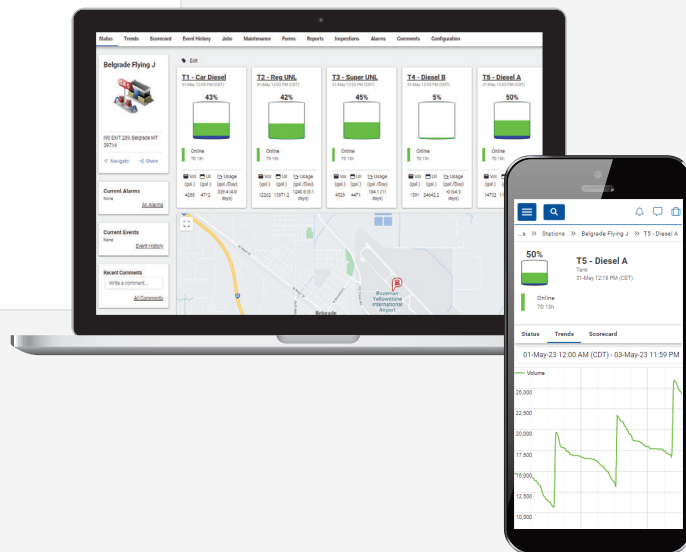

Environment Sustainability

- Monitor fluids to prevent leaks and spills of environmentally harmful fluids, ensuring regulatory compliance
- Prevent overfilling or underutilization of tanks to minimize waste and conserve valuable resources
- Optimize routes and minimize unnecessary trips to achieve cost savings and reduce carbon emissions

Pedigree Technologies OneView™ lets you remotely monitor your tank levels, enabling quick responses to your most critical inventory needs while saving time and money.

How It Works

- ☑ On a single screen, view the current inventory levels of all your tanks

- ☑ OneView™ connects to existing ATG hardware at C-stores, combining tank level monitoring and leak detection

- ☑ Manage your bulk tanks liquid-inventory levels for fuel, chemicals or fertilizer

- ☑ Receive proactive e-mails or text messages when conditions require a response

- ☑ Customized alarms based on low or high tank volume, days-of-inventory, and water in the tank

- ☑ Reports when a delivery has been made

CONNECT THE UNCONNECTED.

Giving you the power to access all equipment, vehicles, and assets in OneView™

- ✓ Truck, Trailer & Asset Management
- ✓ Safety & Compliance
- ✓ Enhanced Fleet Solutions
- ✓ API Integrations
