

# TANK-LEVEL MONITORING

## Save Time and Money

### Monitor Tanks. Make Decisions. Manage Inventories.

OneView™ offers user-friendly, web-based inventory management applications that allow companies to monitor tank levels, schedule deliveries and better manage inventory needs. The turnkey ATG and bulk tank applications share data over the OneView™ platform, keeping you informed on the level, temperature, and condition of your tanks.

## Key Features

Remotely Monitor Tank Levels

Detect ATG Tank Leaks & Line Leaks

Predictive Inventory Algorithms

Customized Dashboards

Trending Analytics & Reporting

Customized Alerts & Notifications

## Benefits

### Improve Inventory Management

- Minimize site visits by remotely monitoring stock levels anytime, anywhere
- Take proactive measures to address critical inventory levels before they result in shortages
- Forecast inventory requirements and efficiently plan to dispatch and optimize routes

### Environment Sustainability

- Monitor fluids to prevent leaks and spills of environmentally harmful fluids, ensuring regulatory compliance
- Prevent overfilling or underutilization of tanks to minimize waste and conserve valuable resources
- Optimize routes and minimize unnecessary trips to achieve cost savings and reduce carbon emissions

### Enhance Operation Stability

- Detect leaks, overflows, and equipment malfunction by taking action on maintenance needs to avoid costly repairs and downtime
- Analyze tank data trends to facilitate thorough inspections and equipment servicing

PedigreeTechnologies.com | 1.800.470.6581

Pedigree Technologies OneView™ lets you remotely monitor your tank levels, enabling quick responses to your most critical inventory needs while saving time and money.

## How It Works

- ✓ On a single screen, view the current inventory levels of all your tanks
- ✓ OneView™ connects to existing ATG hardware at C-stores, combining tank level monitoring and leak detection
- ✓ Manage your bulk tanks liquid-inventory levels for fuel, chemicals or fertilizer
- ✓ Receive proactive e-mails or text messages when conditions require a response
- ✓ Customized alarms based on low or high tank volume, days-of-inventory, and water in the tank
- ✓ Reports when a delivery has been made

# CONNECT THE UNCONNECTED.

Giving you the power to access all equipment, vehicles, and assets in OneView™

- ✓ Truck, Trailer & Asset Management
- ✓ Safety & Compliance
- ✓ Enhanced Fleet Solutions
- ✓ API Integrations
