

TIRE PRESSURE MONITORING SYSTEM

Tire Pressure Monitoring Made Easy Connectivity. Visibility. Productivity.

The Tire Pressure Monitoring System allows for visibility of individual tire pressures and temperatures, giving you the ability to make informed tire maintenance decisions from the cab, the yard, or the main office to extend tire life and improve safety.

Key Features

-  Quick, Self-Install
-  Flexible Bluetooth Connectivity
-  Identifies Tire Leaks Remotely
-  Monitor Tire Temperatures
-  Receive Alerts via In-Cab, Text and/or Email
-  Long-Lasting 5-Year Battery Life
-  Smaller Antenna Size, Smaller Sensor

Benefits

Improved Fleet & Health Visibility

- Limit tread wear and tire leak repairs by taking action on maintenance needs as soon as they are detected
- Quickly identify tire leaks that could lead to roadside accidents
- Simplify and enhance pre- and post-trip inspections

Maximize Uptime

- Increase fuel efficiency by ensuring proper tire inflation
- Strengthen driver satisfaction and retention

Reduce Unplanned Downtime

- Get insights for fast and slow tire leaks, tire over-inflation
- Improve vehicle cost of ownership by optimizing maintenance intervals and avoiding unplanned downtime
- Extend the service life and improve tire performance across your fleet
- Take early action to avoid costly downtime due to roadside repairs and unplanned maintenance

How It Works

The TPMS sensors monitor pressure within the tire of where they are attached to provide information about proper operation pressure before trips, slow or fast leaks, and high temperature.

The telematics devices fitted on the tractor/trailer receive data from reliable TPMS sensors and transmit it efficiently to a robust cloud database. The data is then analyzed, and valuable insights are presented within the OneView™ platform.

The TPMS Advantage

- ✓ Improved Safety
- ✓ Fewer Roadside Events
- ✓ Extended Tire and Tread Life
- ✓ Better Fuel Economy
- ✓ Expedited Inspections
- ✓ Reduce Carbon Footprint
- ✓ Cost Savings

TECHNICAL SPECIFICATIONS

Battery Life	5 Years
Battery Type	Lithium-ion
Dimensions (WxDxH)	Cap Valve: 0.7 (H) x 0.8 in (W) (17.8 (H) x 20.3 mm (W)) Pass-Through: 0.9 x 0.8 x 1.5 in (22.9 x 20.3 x 38.1 mm)
Connectivity	Bluetooth®
IP Rating	IP69K
Temperature	-40 to 203°F (-40 to 95°C)

Cap Valve

Pass-Through

CONNECT THE UNCONNECTED.

Giving you the power to access all equipment, vehicles, and assets in OneView™

- ✓ Truck, Trailer & Asset Management
- ✓ Safety & Compliance
- ✓ Enhanced Fleet Solutions
- ✓ API Integrations
